

**THE BRITISH EMBASSY SCHOOL ANKARA  
MEDICAL PROFORMA**

Name of Child ..... Class .....

Although we aim to take all due care of your child, accidents do happen.

In some circumstances on the spot first aid may be required, in which case the member of staff attending the incident will take such action as would any parent.

If your child requires hospital treatment and you or the emergency contact cannot be located, a member of staff will accompany your child to the nearest hospital.

In the event of a more severe accident or emergency situation, your child will be immediately taken to the nearest hospital and you will be contacted to meet us there.

In either of the above circumstances, the school, acting in loco parentis, will authorise whatever medical treatment the attending doctor prescribes.

**PAINKILLER PROTOCOL**

In the event that my child has pain or fever at school, **I do / do not (please circle appropriately)** consent and authorize the school nurse, or person/s designated by the school nurse to administer Acetaminophen(also known as paracetamol or tylenol) at the appropriate dosage.

**INTIMATE CARE PROTOCOL**

There are occasions when a (mainly younger) child requires intimate care such as toileting, changing soiled clothing and/or washing. The nurse or designated member of staff will be responsible for providing such care. If my child requires this care **I do / do not (please circle appropriately)** consent and authorise the relevant staff to provide this.

**MEDICAL WAIVER**

In the case of a more severe accident or emergency situation and in the event that neither we, the parents, nor the emergency contact, can be located, I authorise the school to consent to such medical treatment including immunisation, surgery or blood transfusion, which, in the opinion of a qualified medical practitioner, may be necessary for my child:
