

## BESA Attainment Results 2020 – 2022

The following data represents attainment results in English, Maths and Middle Years Science over the past 3-year period.

The results are drawn from annual tests provided by GL Education, a worldwide assessment provider used extensively, both in the UK and in international British Schools. These assessments test curriculum attainment against the National Curriculum for England year group expectations in core subjects. The results of these assessments are standardised against large samples of children the same age to offer reliable indications of how BESA pupils are performing compared to UK and international standards.

The data is presented as average standardised scores for each year group who take the assessments with a departmental average. The average score for all students taking the assessment is 100 (represented below on the y axis).

### Outcomes of Primary English (PTE) and Maths (PTM) assessments.

## Outcomes of Middle Years English (PTE), Maths (PTM) and Science (PTS) assessments
